You can make a difference!

The Advisory Council is a group of citizens dedicated to the enrichment of our community. Its support enables us to offer a variety of programs and services for people of all ages, abilities and backgrounds.

Our Advisory Council is always looking for new members. Meetings are held on the fourth Wednesday evening of every month to talk about programs, policies, and financial issues. Citizen direction and participation are vital to our continued success. Advisory Council members also create scholarship opportunities through grant writing and other fundraising activities. If you'd like to get involved, please contact our staff.

Most classes, workshops, sports, and special events are funded through the Advisory Council rather than through Seattle Parks and Recreation. Revenues generated through program fees offset program costs to make Advisory Council activities self-sustaining. We rely heavily on program participation, donations, and contributions to buy, repair, maintain, and upgrade program equipment and supplies.

Students must attend all 8 sessions to graduate

SCAN Community Media is committed to giving a voice to youth in our community. Students will take an idea from the original concept to a finished public service announcement, documentary or dramatic short movie through brainstorming, script-writing and storyboarding techniques taught by SCAN's professional staff. Students will also learn how to use high-quality professional grade camera, audio and digital editing equipment to produce their own messages. SCAN youth programs are not only focused on teaching kids how to be producers of media content, but also how to be better consumers of media content. Our Media Literacy programs teach kids to examine the media and pop-culture with a critical eye, analyze the stereotypes and other harmful messages put forth by the commercial media. Kids are taught to read the sub-texts of advertisements to become more aware that ad makers are selling lifestyles as well as products. Students can then create counter-advertisements or "anti-commercials" to speak back to harmful industry messages.
